

STEM Professional Learning Workshop

How do we develop the skills needed for the jobs of the future?

Teachers and principals are invited to a PL workshop aimed at introducing newly developed STEM curriculum resources. These resources will illustrate a problem-based learning approach, challenging students to seek solutions to open-ended, real-world problems. The workshop provides a rationale for STEM and outlines the instructional model for problem-based STEM learning. This is an opportunity for **teachers** to unpack curriculum modules in **year-based groups** and plan for their implementation while **leaders** explore management and implementation issues.

EVENT DETAILS
